

Zo2 Framework

Last updated: May 24th, 2013

Introduction

Zo2 Framework is an open source for building Joomla templates.

Official website: <http://zo2framework.org>

The source code is licensed under GPL v2, and available at <https://github.com/aploss/zo2/>

Key Features

1. Flexible layout, with 12 columns
2. Reponsive layout based on Twitter Bootstrap
3. Beautiful Bootstrap typography with Font Awesome Icons
4. Combine and minify JS & CSS
5. Shortcode
6. Mega menu
7. Theme color

The following table lists the Zo2' features in comparison with other popular frameworks, including

- T3 framework (<http://t3-framework.org/>), v1.2.5
- Gantry (<http://www.gantry-framework.org/>), v4.1.10
- Helix (<http://helix.joomshaper.com/>), v1.9.6
- Warp (<http://www.yootheme.com/themes/warp-framework>), v6
